DETAILED ACTION

1. The Amendment filed July 14, 2005 has been received and considered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 2-4, 6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,927,820 to Vignotto et al.

Regarding Claim 7, Vignotto et al disclose a connection between a wheel bearing 3 and a wheel carrier 4 (see Figure 2) having all the features of the instant invention including: connecting elements 37 only connecting the wheel carrier 4 and a fixed part 13 of the wheel bearing (see Figure 2 and column 2 lines 50-55), and at least one projection 38 integrated with at least the fixed part 13 of the wheel bearing 3, transmitting to the wheel carrier 4 a torque acting in the fixed part 13 of the wheel during braking (see column 2 lines 50-55), wherein the fixed part of the wheel bearing 3 is structured to couple to a brake caliper 31 (at ears 30, see column 2 lines 37-45).

Regarding Claim 2, projection 38 is formed around, at least formed around the inside of, connecting element 37 as shown in Figure 2.

Regarding Claim 3, see bolt 38.

Regarding Claim 4, see threaded section 35/36 which receives bolt 38.

Regarding Claim 6, the fixed part 13 of the wheel bearing 3 comprises a flange (see Figure 2).

Allowable Subject Matter

4. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 2-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,832,855 and German Patent No. 10202200 both to Hofmann et al., U.S. Patent No. 5,762,559 to Jacob et al., and U.S. Patent No. 3,749,416 to Asberg disclose wheel bearing and wheel carrier connections similar to applicant's..

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
